

## Datasheet – Paediatric First Aid

---

**First Aid for children is not simply a matter of thinking of them as small people. The medical needs of children can be significantly different.**

Our two-day paediatric first aid course covers all you need to know to deliver effective first aid to your children, be they your own or in your care. It meets the Ofsted requirements for registered child minders, and the requirements for nannies under the Approved Carers Scheme. It can also be used as evidence for employees working towards an NVQ in Childcare and Education.

The course has been specifically designed to meet the criteria set by the Department for Education’s Early Years Foundation Stage (EYFS) Framework and is ideal for:

- Those who have gained a level 2 and/or level 3 childcare qualification and have entered into an early years setting and wish to be included in the staff to child ratios to comply with EYFS requirements.
- Registered childminders and assistants who are required to hold a current and full paediatric first aid certificate in order to comply with the EYFS requirements.
- Anyone who has a non-professional involvement with infants and children, such as parents, grandparents and want to learn key paediatric first aid skills.

This course is equivalent to PHEM (Pre-Hospital Emergency Medicine) Level B, as defined by the Faculty of Pre-Hospital Care for providers.
