

Service Description – EURIECA[®] Maintenance Of Skills (MOS) Program

The aim of the program is to ensure that EURIECA trained personal maintain their knowledge, skills, competence and confidence following their initial training.

Trained providers should undertake the following :

- Complete a series of online modules
- Attend a minimum of 2 hours of face-to-face practical training sessions per month, delivered by an 'in-house' trained MOS instructor
- Complete the RQI training as directed
- Month 1 should commence as soon as practicable after the end of the initial course
- MOS training may be combined into a ½ day or full day program, but must be completed on a quarterly basis.

SESSIONS

MOS training sessions should be run using the **Skill Station Lesson Plans (LPs)** and the initial **Course Moulages**, as per the program below. It will be noted that some are repeated a number of times during any year.

QUARTERLY QUALITY ASSURANCE (QA) VISIT

This is in addition to the above, and will include a 'drop-down scenario' exercise, which will be used to measure the effectiveness of the MOS program, and to shape future training plans.

NOTES

Employers themselves are responsible for establishing that their staff have the capabilities requisite to their setting, essential in the interests of patient health and safety. The holding by an individual of a Certificate of Qualification from Trauma Resus does not reduce their responsibility in that aspect.

*The award of the such a certificate indicates that a trained provider has successfully completed their initial training course and completed the assessments but **does not** constitute a licence to practise, without the associated **Clinical Governance**.*
